

# True Green by True Blue

CHEMICALS

True Green is the powerful new cleaning range developed by the same in-house R&D team who brought you the trusted True Blue Chemicals range.

### Powerful cleaning

True Green formulas were developed specifically to provide the powerful effectiveness required by commercial cleaners to do a better job faster and more economically.

### Economical to use

Like the original products from True Blue Chemicals the new True Green range is available in concentrated form within a system that makes them easy to dilute into spray applicators and other working containers.

All True Green 5L containers come with the benefit of the SAFELOCK™ anti-spill system.

### Environmentally safer

In addition to powerful cleaning effectiveness, our R&D team focused clearly on the need to protect our environment, using ingredients that are safer and biodegradable.

True Green products are not only better for the environment but safer for people too.

The True Green system saves time, prevents waste and gets the job done faster, meaning more productive cleaners — and satisfied customers.

# True Green

TRUE STRENGTH, TRUE VALUE, TRULY GREEN.

The True Green range of cleaning chemicals is powerful yet safer on the environment.

## CLEAN ALL

**All-Purpose cleaner for cleaning hard surfaces:**

- highly dilutable
- for washing floors, bench tops and other hard surfaces
- suitable in kitchens, hospitals, nursing homes, motels, hotels, caravan parks, institutions and schools
- versatile – one environmentally friendly product for cleaning many different hard surfaces
- effectively powers through grease, leaving surfaces free of soils, build-ups
- provides a lasting shine
- leaves a fresh bouquet.

## WINDOW SHIMMER

**For cleaning glass, mirrors and windows:**

- fragrance free
- ammonia free
- readily biodegradable
- solubilises grime readily
- anti fouling properties makes subsequent cleaning easier.

## BLITZ

**For shower, toilet and washroom cleaning:**

- readily biodegradable formula
- low odour and low VOC
- dissolves soils and removes soap scum from ceramic tiles, metals and glass shower screens without hard scrubbing
- contains an optimised blend of citric, lactic and glycolic acids to dissolve stubborn soils and stains
- effectively removes mould and mildew leaving showers and toilet bowls fresh clean and shiny
- pleasant pine fragrance leaves bathrooms and washrooms with a sparkling fresh clean finish.

## VIOLET ROSE

**For cleaning, deodorising and freshening living and working environments:**

- readily biodegradable low VOC formula
- cuts through malodour – such as lingering tobacco smoke and cooking fats
- suitable for use when deodorising carpets, rooms and soft furnishings
- significantly reduces odour in garbage bin areas, laundry areas, washrooms and bathrooms
- provides a lasting scent of sweet violets, fresh citrus and warm musk
- helps lift the living environment in dining rooms, restaurants, and hotel and motel rooms.

### Independently accredited

All formulations have been Third Party independently assessed, meeting the stringent requirements of the 'Recognised™ – Environmental Credentials Scheme' for environmentally preferable products as licenced by ACCORD.
